Sustainable Development

- Development that meets the needs of the present without compromising the ability of future generations to meet their own needs.
- This most widely accepted definition of Sustainable Development was given by the Brundtland Commission in its report *Our Common Future* (1987).
- Sustainable development (SD) calls for concerted efforts toward building an inclusive, sustainable and resilient future for people and the planet.

DSPSR Rohini is presenting

Global issues Related to Sustainable Development

- Inequitable growth of national economies (North-South Divide)
- **Loss of Biodiversity:** Despite mounting efforts over the past 20 years, the loss of the world's biodiversity continues.
- **Climate Change:** As a global problem, climate change requires a global solution. Within climate change, particular attention needs to be paid to the unique challenges facing developing countries.
- Tackling climate change and fostering sustainable development are two mutually reinforcing issues.
- **Intellectual Property Rights (IPRs):** There is a need for welfare for all rich and poor to have affordable access to the results of innovation that can lead to sustainable development.
