Date and Time	Jan 15, 2022
Venue	Rohini
Resource Person/ Facilitator	Programme Officer Rotaract - Mr. Vinod Kumar
No. of Participants	30

Vinod Kumar

<p>Summary</p>	<p>There are important differences between washing hands with soap and water and using hand sanitizer. Soap and water work to remove all types of germs from hands, while sanitizer acts by killing certain germs on the skin. Although alcohol-based hand sanitizers can quickly reduce the number of germs in many situations, they should be used in the right situations. Soap and water are more effective than hand sanitizers at removing certain kinds of germs like <u>norovirus</u>, <u>Cryptosporidium</u>, and <u>Clostridioides difficile</u>, as well as chemicals.</p> <p>Hand sanitizers also may not remove harmful chemicals, such as pesticides and heavy metals like lead.</p> <p>Handwashing reduces the amounts of all types of germs, pesticides, and metals on hands. Knowing when to clean your hands and which method to use will give you the best chance of preventing sickness.</p> <p>The Rotaract Club of DSPSR under scheme "Prakshaalak" distributed 150 face masks and 25 sanitizers. The club decided to distribute at least 500-800 masks.</p>
<p>Winners</p>	<p>Not Applicable</p>
