No. of Participants	100

Vinod Kumar

<p>Summary</p>	<p>Our hair is a significant part of our appearance and adds a lot of confidence and character to our personality and self-image.</p> <p>While we're naturally blessed with normal hair growth and good health, there are many who aren't. Awareness about hair donation and manufacturing wigs for cancer patients and survivors, and for patients of auto-immune diseases that don't let hair grow on their bodies. It's worth bearing in mind that human hair wigs tend not to be the first choice for people whose hair falls out after cancer treatment.</p> <p>This is because real hair wigs are expensive and can take some time to make. Manmade (synthetic) wigs are cheaper and are quicker to organize. We collaborated in the District Projects Event MYTH BUSTERS from 20th December to 26th December where we were informed about various myths were busted regarding the hygiene of the hair like lice gets only in dirty hair whereas the truth is they are parasites they need hair to live on regardless of its hygiene.</p>
<p>Winners</p>	<p>Not Applicable</p>
